A maestro for the AI orchestra, Where prompts become products and Plain English becomes a Live URL

Introduction

DeMaestro is an autonomous, multi-agent platform that builds full-stack web applications from natural language. You describe what you want in plain English, and DeMaestro handles the rest — planning, coding, testing, fixing, and deploying. A team of AI agents collaborates across every phase, each with one clear job. The result is a complete, tested, deployed application at a live URL, with no coding required.

Motivation

Building apps takes too long:

A working app needs a frontend, a backend, a database, login, and hosting. Each part needs different skills and tools

Most people can't do all of it:

You either learn everything, hire a team, or never build the thing you wanted

Ideas die before they ship:

The path from idea to a real, online app is too long

Our Solution

- DeMaestro turns one description into a full deployed app
- Many AI agents work together — plan, code, test, fix, ship
- You get a real, working URL — no coding needed

DeMaestro brings full-stack app development to anyone who can describe an idea. Aiming for the removal of the technical barrier between having an idea and putting it online.

Understanding the User

Building the App

Expert's Opinion

"Setting up a new project usually takes me a half day. DeMaestro had a clean, working starting point ready for me in minutes"

Itai Hauptman
Team Lead at SoftMan Solutions

"Seeing the files tree before downloading was useful — I checked the code first to know what I was getting. Some files weren't labeled clearly, though"

Hothaifa Zoubi
Senior Devops Engineer at Intuit

SUS QUESTIONNAIRE - SAMPLE RESPONSE

10 questions answered on a 5-point scale — from 1 (strongly disagree) to 5 (strongly agree).

Q1. I'd use DeMaestro frequently.	4
Q2. DeMaestro felt unnecessarily complex.	2
Q3. DeMaestro was easy to use.	4
Q4. I'd need technical help to use it.	2
Q5. The features were well integrated.	4
Q6. There was too much inconsistency.	2
Q7. People would learn DeMaestro quickly.	4
Q8. DeMaestro was cumbersome to use.	2
Q9. I felt confident using DeMaestro.	4
Q10. I had to learn a lot before using it.	2

1 - Strongly disagree 2 - Disagree 3 - Neutral 4 - Agree 5 - Strongly agree
